

ULTRA SERIES PEDESTAL FILE SPEC SHEET

One-piece pedestal jackets constructed of **20-gauge cold rolled steel combined with 18-gauge full steel bottom. Steel 18-gauge uprights are welded at form on jacket sides (bottom) and to full steel bottom, forming a box construction presenting a rigid case that eliminates “racking.” Multi-formed 18-gauge uprights** accept full progressive steel ball bearing race suspensions for the file drawers and box drawers. **Drawer fronts are formed of 20-gauge** cold rolled steel. Back side of drawer fronts are welded and “dressed” to provide additional strength at pressure points.

Box drawers and file drawers have full progression steel ball-bearing suspensions. All steel drawer fronts provided with multi formed full width recessed pull as standard. Optional slab steel front with decorative pull available. Painted steel drawer fronts are attached with screws as standard, and are field replaceable. Laminated self-edge or 3mm PVC edge wood front drawer option available with waterfall or decorative pull. For up-charge please consult Invincible Customer Service.

Files available in 22-3/32”, 28-3/4” & 29-3/4” depths, 15” and 18” width, 27-13/16” high with glides, 27-7/8” high with casters. Drawer arrangements available in either box/box/file or file/file.

Freestanding pedestals include (4) 1” adjustable floor glides. Drawers are 2 or 3 piece construction. Case jackets available with or without finished steel tops.

Letter file drawers have multi-formed high sides for front to back hanging folders, PVC channel for cross filing of letter or legal hanging rails optional. 18-gauge compressors also available as option.

Mobile Pedestals available in all standard depths, with (4) 2” diameter casters, (2) swivel (2) fixed concealed and recessed into the base channel. Optional 5th caster available, as are counterweights.

Pull-out posting self (reference shelf) now available in all Ultra Series pedestals.

shelf size (usable space) 13” wide x 18” deep for 28” deep pedestals

shelf size (usable space) 13” wide x 13” deep for 22” deep pedestals

Finish: All Invincible[™] steel products are processed through a 5-stage industrial washer to remove oil and organics from the surface while applying an iron phosphate conversion coating to promote adhesion and corrosion resistance as a pre-paint treatment. In addition, parts are rinsed with a non-chrome sealer to aid in paint adhesion and to further protect the metal. **The surface is then painted with environmentally-friendly and highly durable hybrid powder coat paint applied electro-statically and cured at high temperature.** Invincible[™] products are available in a full assortment of standard Invincible[™] colors, both smooth and textured finishes, as well as special order colors.
